Open to remote and on-site roles in Egypt and the GCC

SUMMARY

Mobile team lead and senior Flutter developer with 6+ years shipping production iOS and Android apps, including a real-estate app with 100K+ downloads, a ride-hailing platform and a city-wide super-app. Leads mobile teams from planning to store release, writes native Swift/Kotlin modules when a feature needs them, and ships own backend endpoints in Laravel and Firebase. Uses Claude, Cursor and custom tool-calling agents daily to deliver faster without lowering code quality.

EXPERIENCE

Code Craft — Mobile Team Lead **01/2022 – Present**

UAE-based subcontracted development team delivering mobile apps for multiple client companies · Remote from Egypt

- Lead mobile delivery across client projects: scoping, task distribution, code reviews and release to the App Store and Google Play.
- Set architecture and state-management standards (Clean Architecture, BLoC) reused across projects.
- Build critical modules: payments, maps and real-time location tracking, push notifications and in-app services.
- Delivered Zaheb (ride-hailing, driver and customer apps) and City Guide (multi-vendor super-app) end to end.
- Mentor junior developers through code reviews and knowledge-sharing sessions to shorten onboarding.

Awamer El Shabaka — Flutter Developer **07/2020 – 01/2022**

Saudi company · Mansoura, Egypt · On-site

- Built and shipped multiple Flutter apps for Saudi clients on Google Play and the App Store.
- Wrote technical documentation for internal teams and client stakeholders.

SELECTED PROJECTS

Client names are withheld where the work is confidential.

- **Zaheb — Ride-hailing & delivery (driver + customer apps).** Real-time location tracking, driver assignment, order management and live status updates. Driver: Android / iOS · Customer: Android / iOS
- **City Guide — City-wide services super-app.** Multi-vendor marketplace where businesses showcase products and services and customers order and chat with vendors directly. Android / iOS
- **Real-estate marketplace — Client project, 100K+ downloads.** Property search with advanced filters, saved and compare lists, price-change alerts, maps and direct buyer-to-seller contact; kept large listing datasets smooth on both platforms.
- **Delivery & logistics platform — Client project (store + driver apps).** Merchants manage orders and dispatch; drivers go online, accept jobs and track weekly earnings. Supports an in-house fleet and an on-demand driver pool.
- **Memorial services app — Client project.** Guides families through obituaries, funeral arrangements and required paperwork, with services filtered by religious practice.
- **E-commerce platform — Client project.** Store management, product catalogs, checkout, payments, vouchers, discounts and wallets with robust validation and error handling.

SKILLS

Mobile: Flutter, Dart, Swift (iOS), Kotlin and Java (Android), native module integration, custom widgets and animations

Architecture: Clean Architecture, MVVM, BLoC, Provider, GetX

Backend & APIs: Laravel, Firebase, Firebase Functions, AWS, REST, GraphQL, WebSockets

Quality & delivery: CI/CD (GitHub Actions, Bitrise), unit, widget and integration testing, performance profiling, Git, Agile/Scrum

AI engineering: Claude, Cursor, Copilot; tool-calling agents and MCP integrations that automate delivery workflows

EDUCATION & LANGUAGES

Bachelor of Business Administration (BBA) — Mansoura University **2024**

Languages: Arabic (native) · English (professional working proficiency)
